**Question: Another name appeared on my Social Security Number Trace; am I a victim of identity theft?**

**Answer:** This is a surprisingly common occurrence, and does not necessarily indicate identity theft. Generally, it is the result of a typographical error. If the Social Security Number is reported incorrectly, that number, along with the name, date of birth, and address records attached to it, will erroneously appear on another person's report.

*TIP: Also, if you have filed for joint credit with a spouse, parent, or other relative, it is possible that their name will appear on your Social Security Trace by accident.*

*If you do suspect identity theft, contact one of the three main credit bureaus: [Equifax](#), [Experian](#), or [TransUnion](#) or to see all three at once try [annualcreditreport.com](#) for a free copy of your credit report. The credit bureau will be able to place a fraud alert on your record and assist you in correcting your credit history and proper address history if needed.*
